

IBPS Reply of Pre Bid Queries recieved from M/s Literay
Query/ Suggestions

Sl. No.	Page	Section	RFP Clause	IBPS Reply
1	79	Section 9 – Technical & Functional Requirements	9.2 Candidate Authentication & Document Management Intelligent Document Processing (IDP) Secure Document Repository Supported document formats shall include PDF, JPG, JPEGG, PNG, DOC and DOCX.	Based on the requirements outlined in the RFP, we recommend that bidders be mandatorily required to include an Enterprise Document Management System (DMS) as an integral component of the proposed solution. The DMS should provide a secure and centralized repository for all documents captured or generated during candidate registration, application processing, and examination-related activities, with controlled access for authorized department users. Unless the Department explicitly mandates the use of an Enterprise DMS, bidders may rely on traditional file-storage mechanisms, which have significant limitations in managing large volumes of documents. These typically include limited metadata management, document versioning, real-time indexing, advanced free-text search, document lifecycle management, and access controls. An Enterprise DMS, with these capabilities as standard features, would enable the Department to efficiently manage, retrieve, track, and govern candidate and examination-related documents throughout their lifecycle. Therefore, we request that an Enterprise Document Management System be made a mandatory and integral component of the RFP, covering the secure management of all candidate registration, application, and examination-related documents.
2	80	9.4 Recruitment Workflow Management:	Workflow shall be configurable without source code modification.	Based on the latest industry standards and technological advancements, we recommend that the RFP mandate a dedicated Low-Code Engine to enable the rapid development and configuration of applications and workflows through a GUI-based, configuration-driven approach, minimizing traditional coding and deployment efforts. The Low-Code Engine should extend beyond workflow automation to support configurable applications such as candidate registration, application processing, and departmental review processes, enabling faster implementation and easier adaptation to evolving requirements. Therefore, a dedicated Low-Code Engine should be an integral component of the proposed solution.
3	83	9.11 Technical Requirements:-	Support minimum 20,000 concurrent users (configurable based on project requirements).	As per RFP
4	83	9.11 Technical Requirements:-	Support High Availability (HA) and Disaster Recovery (DR).	As per RFP
5	83	9.11 Technical Requirements:-	Support High Availability (HA) and Disaster Recovery (DR).	As per RFP
6	83	9.11 Technical Requirements:-	Support High Availability (HA) and Disaster Recovery (DR).	As per RFP

7	E. The functional requirement for Revamping and hosting of IBPS Website.	122	The SP shall manage all Website related matters. 3 The SP shall maintain the Website. 4 The SP shall make minor shifts in the layout of the Website as and when required by IBPS during the Contract period	Please clarify if the existing website needs to be redeveloped on better technologies and standards by using an Enterprise Content Management System (CMS) or is it only expected to manage and re-host the websites?	As per RFP
8	E. The functional requirement for Revamping and hosting of IBPS Website.	122	After 2 Years if and when IBPS requires revamping of the website the SP shall do so, for which payment shall be made as per the Commercials agreed upon.	If the website is expected to be revamped in 2 years of time, it is essential that the bidders provision an Enterprise CMS at this stage so that whenever the website needs to be redeveloped, there is an existing platform which can be leveraged. Considering the scale and business of IBPS, free or community versions of CMS should not be allowed as they tend to have security issues while an Enterprise version of CMS will ensure security, OEM support and regular availability of newer upgrades so that whenever the website is required to be redeveloped, it can be done on the newest version of the product. Hence, we humbly request to mandatorily specify the usage of an Enterprise CMS by bidders which will not only help in the later redevelopment of the website, but will also ensure the creation of other portals and access points.	As per RFP
9	E. The functional requirement for Revamping and hosting of IBPS Website.	122	After 2 Years if and when IBPS requires revamping of the website the SP shall do so, for which payment shall be made as per the Commercials agreed upon.	What is the current peak concurrent website visitors per min and what should be considered as an annual growth?	As per RFP

IBPS Reply of Pre Bid Queries received from M/s Apnosys Technology Pvt Ltd
Tender Ref. IBPS/RFP/2026-27/ISS-007 dated 17-Aug-2026

IBPS Reply

Sl. No.	Page No.	Clause / Reference	Clause Details as per RFP	Clarification / Modification Sought by Apnosys	IBPS Reply
1	61 / 98 / 117 & W	Clause 8.1(A), Sl. No. 2 – Financial Criteria / Annexure 26.	Bidder should be a profit-making/positive net-worth company and have minimum average annual turnover of ₹200 Cr in the last three audited financial years from Indian Operations only – FY23-24, FY24-25 & FY25-26.	Since Apnosys is a registered MSME and has an average annual turnover of approximately ₹150 Cr during the last three financial years, we request IBPS to kindly provide the applicable MSME relaxation in the minimum turnover criterion and reduce the threshold from ₹200 Cr to ₹150 Cr (or such lower threshold as permissible). This will enable participation of capable MSME system integrators while maintaining the financial capability requirement of the RFP.	Bidder should be a profit-making/positive net-worth company and have minimum average annual turnover of ₹150 Cr in the last three audited financial years from Indian Operations only – FY23-24, FY24-25 & FY25-26.
2	61 / 98 / 117	Clause 8.1(A), Sl. No. 2 – Financial Criteria	Minimum average annual turnover of ₹200 Cr is prescribed.	Alternatively, kindly permit the turnover requirement to be assessed at 75% of the prescribed threshold for MSME bidders, i.e. ₹150 Cr instead of ₹200 Cr, in line with the objective of promoting participation of capable MSMEs in Government procurement.	Minimum average annual turnover of ₹150 Cr is prescribed.
3	53-54 / Annexure 5	Clause 7.4, Stage-A Technical Evaluation – Average Annual Turnover	Turnover scoring starts at ₹200 Cr – ₹225 Cr = 5 marks; ₹225 Cr – ₹250 Cr = 10 marks; >₹250 Cr = 15 marks.	If MSME relaxation is granted for mandatory eligibility, kindly extend the same relaxation to the technical scoring matrix. We request that an MSME bidder with average annual turnover of ₹150 Cr be considered eligible for corresponding marks, instead of being assigned zero marks solely because the scoring starts at ₹200 Cr.	Turnover scoring starts at ₹150 Cr – ₹200 Cr = 5 marks; ₹201 Cr – ₹225 Cr = 10 marks; >₹225 Cr = 15 marks.
4	53	Clause 7.4, Sl. No. 1 – Turnover Scoring	Maximum 15 marks are linked exclusively to turnover bands starting from ₹200 Cr.	Kindly revise the turnover scoring bands for MSMEs proportionately, e.g. ₹150 Cr to <₹175 Cr – 5 marks; ₹175 Cr to ₹200 Cr – 10 marks; >₹200 Cr – 15 marks; or provide equivalent relaxation in scoring. This would ensure that the MSME relaxation is meaningful in both eligibility and technical evaluation.	Turnover scoring starts at ₹150 Cr – ₹200 Cr = 5 marks; ₹201 Cr – ₹225 Cr = 10 marks; >₹225 Cr = 15 marks.
5	61-62 / 98-99	Clause 8.1(A), Sl. No. 8 – Experience	Bidder should have successfully implemented/commissioned at least 3 online Application/Recruitment Portal projects of minimum ₹50 lakh each during the last 3 years.	Kindly clarify whether, for MSME bidders, experience requirements may also be relaxed, such as reduction in the number/value of qualifying projects, provided the bidder demonstrates relevant experience in online application/recruitment/e-Governance projects.	Bidder should have successfully implemented/commissioned at least 3 online Application/Recruitment Portal projects and its related IT/ITes of minimum ₹50 lakh each during the last 3 years.
6	61-62 / 98-99	Clause 8.1(A), Sl. No. 9 – Manpower Strength	Minimum 50 IT professionals on payroll, with at least 10 having minimum 2 years' experience in deployment/management of required services.	Considering the MSME status of the bidder and the specialized nature of the project, kindly allow equivalent demonstrated technical manpower through a combination of permanent employees and deployed project resources, subject to availability of the required skill sets. Alternatively, kindly reduce the minimum manpower threshold for MSMEs.	As Per RFP
7	52-53	Clause 7.3 – Technical Evaluation Methodology	Stage A – SI capability/relevant experience: 50 marks; Stage B – Technical Presentation: 30 marks; Stage C – References: 20 marks. Minimum technical qualifying score is 70/100.	Since the turnover criterion already has a significant 15-mark component, kindly consider reducing the weightage attached to bidder turnover and increasing the weightage for relevant project experience, technical capability and solution quality. This would enable technically competent MSMEs to compete on actual project capability rather than organizational turnover alone.	As Per RFP
8	53-55	Clause 7.4 – Stage A Technical Scoring	Relevant experience includes deployment of Online Recruitment Systems, Examination Systems and e-Governance Portals for Government/PSUs, with project-value based scoring.	Kindly clarify whether multiple work orders/projects executed for the same client will be counted separately, provided each project independently satisfies the prescribed scope/value criteria. This will enable accurate recognition of bidders' relevant domain experience.	As Per RFP
9	56-57	Clause 7.6 – Stage C References	At least two references are required, with marks based on feedback; two references can yield the full 20 marks.	Kindly clarify whether references from Central/State Government, PSU, Autonomous Bodies, BFSI and other regulated/public-sector organizations will be treated at par, provided the executed scope is substantially similar to the present RFP.	As Per RFP

			Table 1: payments are based on actual successful candidate registrations; Table 2: is based on actual activities/services available. Invoices are monthly and payment is within 30 days from receipt of correct and complete invoice/supporting documents, subject to satisfactory performance/SLA compliance.	Since the project involves substantial upfront application development, infrastructure/software provisioning, integration and implementation effort, kindly provide milestone-based payment for one-time development, implementation, integration, testing and Go-Live activities, rather than making payment predominantly dependent on actual registrations/usage.	As Per RFP
10	68-71 Clause 8.9 – Payment Terms		No minimum business guarantee or minimum volume commitment is assured by IBPS; payments are based on actual usage/registrations/services.	Kindly provide indicative/committed minimum volumes or minimum annual billing commitment, particularly for the fixed development, hosting, support and manpower components, so that bidders can reasonably estimate costs and quote sustainable rates.	As Per RFP
11	69-71 Clause 8.9 – Payment Terms		Disputed portion of an invoice may be withheld until resolution; payment is otherwise within 30 days of complete invoice and documents.	Kindly clarify that only the disputed portion of an invoice shall be withheld and the undisputed portion shall be released within 30 days.	As Per RFP
12	69-71 Clause 8.9 – Payment Terms		Payment is linked to satisfactory completion of milestone/report/delivery and certification by IBPS.	Kindly provide a clear milestone-wise payment percentage schedule for Requirement Study, Development, Integration, UAT, Go-Live and Stabilization to facilitate accurate commercial pricing and cash-flow planning.	As Per RFP
13	69-71 Clause 8.10 – Milestones / Payment		Delay attracts ₹1 lakh per week, subject to 10% of TCV; uptime below 99.9% attracts ₹50,000 per incident subject to 20% of monthly invoice; critical incident delay attracts ₹15,000/hour; critical-event disruption attracts ₹50,000 or actual loss, whichever is higher.	The RFP provides multiple and potentially overlapping penalties. Kindly clarify that aggregate SLA penalties/liquidated damages for the same incident/event shall not be imposed under multiple heads and that the bidder shall not be subject to duplicate recovery for the same service failure.	As Per RFP
14	64-67 Clause 8.6 – SLA & Penalties		For other service deficiencies, IBPS may impose a reasonable penalty based on severity, determination of breach, impact and quantum by IBPS is stated to be final and binding.	Kindly provide objective and measurable SLA parameters, severity definitions and corresponding penalty slabs, and allow the SI an opportunity to respond/rectify before imposition of discretionary penalties.	As Per RFP
15	66-67 Clause 8.6 – SLA Penalties		Cumulative penalty ordinarily not to exceed corresponding invoice value, but the limitation does not apply to fraud, wilful misconduct, data breach, confidentiality breach, IP violations or regulatory penalties.	Kindly clarify that penalties/IDs attributable to events within the SI's reasonable control and responsibility shall be subject to an overall contractual cap, while consequential/indirect losses and third-party/system/infrastructure dependencies shall be excluded where not attributable to the SI.	As Per RFP
16	66-67 Clause 8.6 – Maximum Penalty		Three-year comprehensive warranty/support is mandatory, with option for two additional years of CAMS at the same terms/rates.	Kindly clarify whether the three-year warranty/support period commences from Final Acceptance rather than Go-Live, since the RFP also states that AMC commences from Final Acceptance. Kindly also clarify the scope of the optional additional two-year CAMS and whether acceptance of the option is annual.	From Go-Live
17	67-68 Clause 8.7 – Warranty & Support		No increase in price is permitted for any reason whatsoever during the entire contract period.	Since the contract may extend beyond the initial three-year period and may include significant manpower/infrastructure costs, kindly permit price revision for statutory changes, substantial changes in taxes/levies, or extension beyond the initial contract period, subject to mutual agreement.	As Per RFP
18	71 Clause 8.11 – Price		IBPS may place repeat orders for equipment/licenses at quoted unit rates for one year from acceptance of the solution.	Kindly clarify the maximum permissible value/quantity of repeat orders and whether the repeat-order provision will apply to software development/services and manpower in addition to equipment/licenses.	As Per RFP
19	71 Clause 8.13 – Repeat Order		Commercial evaluation is based on Total Contract Value; lowest TCV receives 30 marks and other bidders are scored proportionately.	Kindly clarify the basis for calculation of TCV where pricing consists of per candidate, annual, one-time, transaction-based and actual-usage components, and confirm the assumed quantities/volumes to be used for commercial comparison.	As Per RFP
20	58-59 Clause 7.7 – Commercial Evaluation		Commercial format includes pricing for first three years, potentially extendable by two additional years, with several activity-based/annual/per-candidate components.	Kindly provide firm estimated quantities/annual volumes for each price component, wherever possible, and clarify the treatment of variable/actual-usage items while calculating TCV so that all bidders are evaluated on an identical commercial basis.	As Per RFP
21	58-59 Commercial Bid – Annexure R		Technical and commercial scores are combined, with 70% technical and 30% commercial weightage.	Considering that the procurement is based on QCBS and technical capability is critical, kindly clarify whether commercial evaluation will be based only on the comparable fixed/estimated components, with pass-through statutory/third-party charges evaluated separately, to avoid distortion in commercial scoring.	As Per RFP
22	58-59 Commercial Evaluation / QCBS
